

**Precision Burning, Blanchard Grinding, & Fabricating
to 28 Thousand Pounds.**

Steel • Aluminum • Stainless

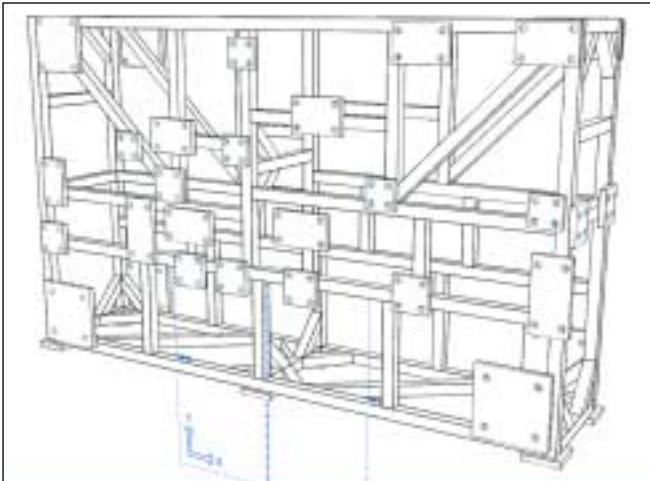

QUALITY

Capital Welding emphasizes a total quality management approach to all of its work. To ensure that all of its customer's needs are being met, Capital provides all requested certifications for material, welding, heat treating, and inspection reports.

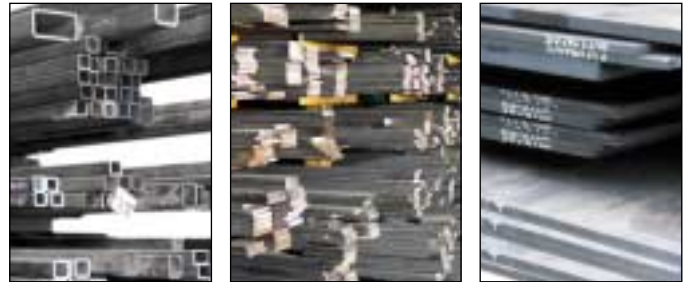

ESTIMATING

Capital's sales staff are also its estimators. We will quote at your location as needed, allowing you a quicker response time.

INVENTORY

In addition to most standard sizes of A36 H.R.S. plate, bar, square and rectangular tubing, structural channel, beam and pipe, Capital Welding stocks a large supply of Type 304 Stainless Steel plate, 6061-T6 Aluminum plate, bar and tubing, 1045 plate, 1060 plate, and "free machining" plate. Due to the large volume of material Capital Welding uses each year, our suppliers will generally fill any of our "non-stock" requests within 24 hours.

CUTTING

Capital has three CNC burning machines for cutting shapes in steel up to 12" thick. Two and three way burnout shapes are easily accomplished.

Two of the burning machines are equipped with Plasma capabilities for cutting of aluminum to 2" thick and stainless steel to 1.25" thick.

Capital utilizes five horizontal and two vertical band saws for square and miter cuts to 17" wide by 13" high.

provides a wide variety of services from small part prototypes to large part production.

BUILD

Capital has thirteen build and weld stations utilizing over thirty power transformers. We have the capability of building fabrications from 1 pound to 28,000 pounds, up to 10 feet wide by 20 feet long. Eight stations are equipped for aluminum work, with four of these having liquid cooled aluminum MIG welding machines to accommodate even the largest aluminum fabrications.

VIBRATORY

In house vibronic stress relieving is available for aluminum, and will expedite delivery of mild or stainless steel.

CONFIDENCE

Through our experience, leadership, & attention to detail, you can be confident in Capital Welding with your order from start to finish.

Whether your order is for a simple burnout...

...a small weldment...

...a large steel or aluminum machine base...

...a complex fabricate and machine complete part...

...or an 8 ton, machine, pipe, wire, and paint assembly;

Let Capital Welding, with its dedication to high quality and on-time deliveries, assist you with solutions to your project requirements.

HISTORY

Capital Welding started in business in 1970. Since then, it has grown to its current size through dedication to customer service and proper management. By focusing on these, Capital Welding has been able to establish long term partnership relationships with customers and vendors alike.

Currently, Capital has 32,000 square feet of manufacturing space with five overhead bridge cranes.

Capital Welding wants to be your full service supplier.
